Education

FLAME University, Pune (100% Merit Scholarship) **Aug 2022 – May 2026**
B.Sc. (Hons.) in Computer Science and Design CGPA: 7.0

Vidyagyan Leadership Academy, Bulandshahr **June 2015 – May 2022**
CBSE High and Secondary School 10th: 92.5%, 12th: 92%

Internship Experience

Digi Electro Media, New Delhi **May 2025 – June 2025**

- Maintained and enhanced WordPress web applications, troubleshooting issues and improving reliability and functionality.
- Customized and updated a production website while resolving layout, content, and usability issues.

Netzent Technologies, Lucknow **May 2024 – July 2024**

- Received hands-on training in HTML/CSS and software development practices from experienced developers.
- Developed responsive interfaces and structured layouts following modern web development practices.

Ek Pahel B.R. Memorial Welfare Society **May 2023 – June 2023**

- Analyzed student and event data using Excel to support reporting and program evaluation.
- Designed and conducted interactive learning programs (sports, debates, quizzes, public speaking) to improve student engagement.

WageIndicator Foundation **October 2022 – April 2023**

- Created posts for various social media platforms- Instagram, Facebook, and LinkedIn- to increase the outreach of WageIndicator.
- Understand and analyze the content on the WageIndicator websites and utilize it to create designs to go up on the global social media platforms of the WageIndicator Foundation.

Projects

Library Footfall Analytics | React.js, Node.js, Express.js, MySQL, MSSQL, Python, Gemini API

- Built a full-stack analytics platform converting biometric entry/exit logs into live occupancy, footfall trends, peak-hour and study-duration insights through 46 REST API endpoints with JWT authentication.
- Contributed to live-occupancy, Gemini-powered chatbot, and Excel/PDF reporting modules; deployed on the university server (Apache, HTTPS) and commended in writing by library staff.
- Led testing: 150 automated tests, validated dashboard and chatbot outputs against direct SQL queries.

RAG & Fine-Tuning for Domain-Specific Q&A | Python, Llama 3.2, QLoRA, ChromaDB, FAISS

- Fine-tuned Llama 3.2 with QLoRA on 3,000+ QA pairs from 55 T20 matches and built a RAG pipeline (ChromaDB, FAISS, sentence-transformer embeddings) over 2,939 retrieval chunks.
- Benchmarked RAG, fine-tuned, and base models on 50 test scenarios; RAG scored 4.5/5 terminology and 4.3/5 reasoning and cut hallucination rate from 20% to 5%.

Customer Response Copilot | React.js, Node.js, Groq API (LLaMA 3.3 70B), Firebase

- Built an AI email assistant that classifies sentiment, category, urgency, churn risk, and escalation, and generates draft replies with human-in-the-loop review.
- Implemented Gmail integration (IMAP, OAuth 2.0), batch analysis, scheduled SMTP sending, Firebase Google Sign-In, and response caching to reduce redundant API calls.

I Agricult – Agriculture Marketplace | C++, OOP, STL

- Built a role-based C++ marketplace using OOP (encapsulated Farmer and Customer classes) with login, crop listings, pricing, stock management, purchasing, and payment history.

IPL Data Analysis & Fantasy Team Dashboard | C++, STL, Algorithms

- Built a 1,600+ line C++ analytics app on IPL data (2008–2023; 15,667 rows, 12 columns) with player, team, points-table, and fantasy-team modules.
- Implemented and benchmarked Merge, Quick, and Bucket Sort using `chrono`; used STL maps and vectors and cleaned missing values in the dataset.

Technical Skills

Programming: Python, C++, C, JavaScript, HTML, CSS, SQL
Design & Development: React.js, WordPress, UI/UX Design, Figma, Canva
Databases: MySQL, MSSQL, SQLite, Query Optimization, Data Processing
AI/ML: RAG, LLM Fine-Tuning (QLoRA), ChromaDB, FAISS, Google Gemini API, Groq API
Core CS: Data Structures & Algorithms, OOP, DBMS
Systems & Tools: Git, GitHub, Linux, VS Code, MS Excel, MS Word

Achievements & Leadership

Head of Events, FLAME Run Club | **Member**, FLAME Admissions and Financial Aid Team | **Bronze Medalist**, CBSE Football Cluster
